### **Ölçümlerde Kullanılan Metotlarla İlgili Açıklamalar / Explanations About the Methods Used in Measurements**

Bütün metotlar için sadece dersi geçen öğrencilerin notları kullanılacaktır. / For all methods, only the grades of students who pass the course will be used.

- G = Bölüm tarafından belirlenmiş olan başarılı sayılabilecek minimum not / G = Minimum grade that can be considered successful as determined by the department
- T = Program çıktısı başarısı için eşik değer / T = Threshold value for program output success
- M1: Öğrencilerin %T'sinin dönem toplamlarının en az G olması / M1: T% of the students to have a semester total of at least G
- M2: Öğrencilerin %T'sinin dönem toplamlarının en az bölümdeki dönem toplamlarının ortalaması kadar olması/ M2: T% of the students of the department to have a semester total of at least that of the department average
- M3: Öğrencilerin dönem toplamlarının ortalamasının en az G olması / M3: Average semester total of students of the department to be at least G
- M4: Öğrencilerin %T'sinin dönem toplamlarının en az tüm bölümlerdeki tüm öğrencilerin dönem toplamlarının ortalaması kadar olması / M4: T% of the students of the department to have a semester total of at least average semester total of all students from all departments

### Ölçümlerde Kullanılan Metotlarla İlgili Açıklamalar / *Explanations About the Methods Used in Measurements*

Bütün metotlar için sadece dersi geçen öğrencilerin notları kullanılacaktır. / *For all methods, only the grades of students who pass the course will be used.*

- G = Bölüm tarafından belirlenmiş olan başarılı sayılabilecek minimum not / *G = Minimum grade that can be considered successful as determined by the department*
- T = Program çıktısı başarısı için eşik değer / *T = Threshold value for program output success*
- M1: Öğrencilerin %T'sinin dönem toplamlarının en az G olması / *M1: T% of the students to have a semester total of at least G*
- M2: Öğrencilerin %T'sinin dönem toplamlarının en az bölümdeki dönem toplamlarının ortalaması kadar olması / *M2: T% of the students of the department to have a semester total of at least that of the department average*
- M3: Öğrencilerin dönem toplamlarının ortalamasının en az G olması / *M3: Average semester total of students of the department to be at least G*
- M4: Öğrencilerin %T'sinin dönem toplamlarının en az tüm bölümlerdeki tüm öğrencilerin dönem toplamlarının ortalaması kadar olması / *M4: T% of the students of the department to have a semester total of at least average semester total of all students from all departments*

## 5. DEĞERLENDİRME / EVALUATION

### 5.1. PROGRAM ÇIKTILARI ÖLÇÜM SONUÇLARININ DEĞERLENDİRİLMESİ / EVALUATION OF PROGRAM OUTCOMES MEASUREMENT RESULTS

Four courses in the fall semester and two in the spring semester fell short of meeting the minimum performance ideals set by the department. In what follows, psychology students' performance in each course is discussed.

#### Fall 2023-2024:

**MBG 110 (Introduction to Modern Biology):** The method used to evaluate the quality of this course was M1. Accordingly, at least 50% of department students had to get a minimum of 50/100 for this course to meet the targeted standard. This course fell short of the targeted performance ideal by three students. This year, a departmental peer support group was established for 4<sup>th</sup>-year students to help 1<sup>st</sup>-year students with questions. The undergraduate coordinator specifically asked the peer mentors to share strategies that may help students succeed at MBG 110. The method used to calculate success in this course in QME was M1, where half of the department students enrolled in this course needed to get 50% or more. In the fall semester, 9 out of 25 department students achieved this ideal. However, the mentoring provided by the 4<sup>th</sup> year students seems to be effective since there was no problem satisfying this criterion in the Spring semester (61 out of 65).

**PSY 101 (Introduction to Psychology - Cognitive and Biological):** The method used to evaluate the quality of this course was M2. Accordingly, at least 50% of our department's students had to obtain the course average or above. The course fell short of this objective with only one student (i.e., 29 out of 59 students were successful). Given that such a variance is expected and that this course has not shown similar underperformance previously or in the spring semester, we did not take extra action.

**PSY 220 (Brain and Behavior):** The method used to evaluate the quality of this course was M2. Accordingly, at least 50% of our department's students had to obtain the course average or above. Two more students had to score at or above the department's average to reach this course's QME objective (i.e., 17 out of 37 students met the criteria). This course does not regularly fall behind in QME evaluations. Given that variations are expected, and sometimes a course can miss its mark by a thin margin, we decided to keep an eye on the course to intervene if such underperformance was repeated.

**PSY 240 (Developmental Psychology):** The method used to evaluate the quality of this course was M2. Accordingly, at least 50% of our department's students had to obtain the course average or above. This course missed the objective set by the department by one out of 30 students (i.e., i.e., 14 out of 30 students met the criteria). Given that variations are expected, and sometimes a course can miss its mark by a thin margin, we decided to keep an eye on the course to intervene if such underperformance was repeated.

### **Spring 2023-2024:**

**PSYC 203:** The method used to evaluate the quality of this course was M2. Accordingly, at least 50% of our department's students had to obtain the course average or above. This course missed the objective set by the department by one out of 29 students (i.e., 14 out of 29 students met the criteria). Given that variations are expected, and sometimes a course can miss its mark by a thin margin, we decided to keep an eye on the course to intervene if such underperformance was repeated. However, as will be explained in section 5.2, we have revised the course content and methods significantly for the next semesters with the aim of preparing our students better statistically for research and applied endeavors.

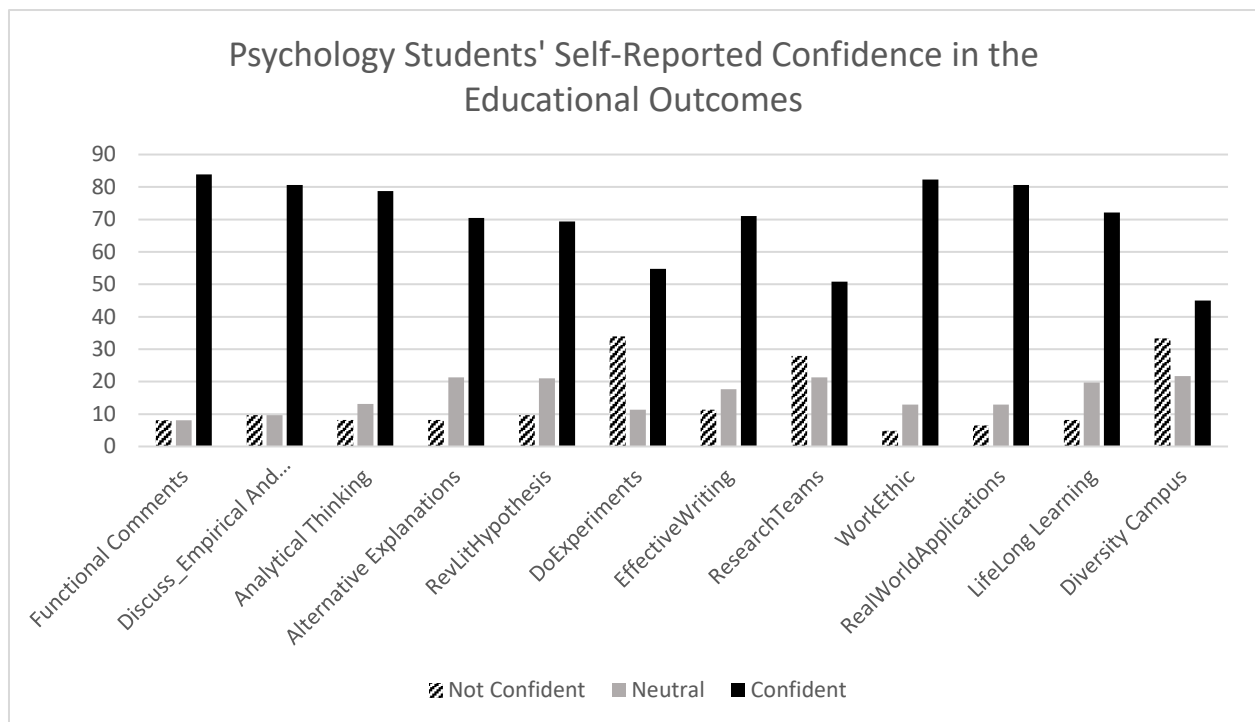

**PSYC 433 (Abnormal Psychology):** The method used to evaluate the quality of this course was M2. Accordingly, at least 50% of our department's students had to obtain the course average or above. This course missed the objective set by the department by one out of 35 students (i.e., 17 out of 35 students met the criteria). Given that variations are expected, and sometimes a course can miss its mark by a thin margin, we decided to keep an eye on the course to intervene if such underperformance was repeated. As will be discussed in section 5.2, we are in the process of making significant improvements to the course, which will be reflected in the Fall and Spring semesters of the 2024-2025 academic year.

**Conclusion:** No course fell short of academic objectives across both semesters. When they fell short of the objectives, this was by a negligible margin that can be attributed to expected variation in standard distribution. The MBG 110 course, in which our students underperformed in the previous years, was no longer a problem in the spring semester. We think this is due to the targeted peer mentoring practices we implemented throughout the year. We will be continuing our efforts to maintain our students' performance on this course.

## **5.2. EĞİTİM AMAÇLARININ DEĞERLENDİRİLMESİ / EVALUATION OF EDUCATIONAL OBJECTIVES**

### **Student Feedback 2023-2024:**

Students have filled out the annual psychology department evaluation survey. In this survey, they indicated how confident they felt that they reached the departmental outcomes. As can be seen in the graph below. For all outcomes from (a) to (k) students more than 50% of students reported confidence. The lowest confidence ratings were seen for (f) and (h). The former outcome is "*Design experiments to test hypothesis, collect data using a variety of methods, and analyze data using statistical methods and software*" and the latter outcome is *Effectively participate in research teams*.

**Suggestions from the Advisory Board:** In our advisory board meeting, the board members were consulted about some of the comments collected from the undergraduate survey. The following key points will be implemented in the 2024-2025 academic year.

- a. The use of multiple statistical packages, preferably SPSS and other open-access software (e.g., R, JASP), should feature heavily in both statistics must courses (PSYC 203 and Psyc 205).
- b. The department will actively try to involve prep students in departmental socials. As a first step, prep students will be invited to the GE 100 Orientation Cocktail. In addition, the psychology club will be asked to invite prep students to their activities specifically. Finally, the department will reach out to the prep students once every semester via a conversational activity.
- c. In the GE orientation presentation, a section will be devoted to how to choose elective courses that will support their career and personal goals.

**Corrective and Preventative Actions Taken during the 2023-2024 Academic Year:**

- a. **Implementing a Peer Mentoring Program:** Over 15 psychology senior students volunteered to participate in a mentoring program. These students formed a mobile chat group (via WhatsApp) and invited all 1st year and Prep School students. The younger students were able to ask any and all questions to the group, from how to enroll for a different section of a course to the best ways to study for a particular course. Many 1st year students expressed gratitude for their peer mentors' time and effort. The undergraduate coordinator met with the mentors several times during the year to hear their opinions, learn about the most frequently asked questions, and generate ideas to help new students adjust to university life.

- b. Revising and Updating the Content of and Techniques Used in the Statistics Courses:** In the past several years, the evaluation survey undergraduate students fill has revealed that they would like more updated education in statistics. They complained about not being able to take what they learned from the statistics courses and apply it to the data they collect for their senior thesis and other experimental work. In order to remedy this situation, five faculty members met with the department chair and the undergraduate coordinator. Collectively, we reviewed the content of PSYC 203 and PSYC 205 courses (Statistics I and Statistics II). The group decided on a statistics software package. The textbook, which was not specifically geared towards psychology students, was changed to a text that provides the same information with examples from psychological studies.
- c. Maintaining Consistency and Updating Clinical Psychology Courses in line with Latest Advances in the Field:** The psychology department has been looking to add a clinical psychologist to its faculty for the past few years. This year, our recruitment efforts yielded two excellent candidates. Of which one was offered a position. This colleague is a younger faculty member with extensive training in different therapy techniques, the latest advancements in diagnosis, and quantification efforts for treatment and research. She is excited to join our team and will contribute to updating the course content and teaching techniques. She will teach four clinical courses a semester, which is bound to answer some of the feedback we receive from the students asking for a full-time clinical faculty member.
